Patents List for MyDigitalID

No.	Application No.	Patent Title
1	PI 2020005133	Socket Association For Transfer Of Socket Authentication Status
2	PI 2017705186	Physical Access Control Via Challenge-Response Interaction
3	PI 2018001925	Security Framework For Transaction Signing
4	PI 2019007068	A System And Method For Digital Identity Data Change Between Proof Of Possession To Proof Of Identity
5	PI2019007959	System And Method For Determining Wireless Network Performance
6	PI 2019007776	Transaction Signing With Ergonomic Addressing And Compact Encapsulation
7	PI 2019007775	Crypto-Physical Lock Control And Authorisation
8	PI 2020004452	System And Method For Adaptive Authentication
9	PI 2016704796	Method And System For Determining User Authentication To Application Server
10	PI 2019007696	A Method For Authenticating And Synchronizing Offline Data
11	PI 2017001950	A System And Method For Managing Role Of Administrators
12	PI 2017705108	Method And System For Automated Selection Of Login In A Multi-Modal Authentication System
13	PI 2017705162	Transaction Signing On Multiple Channels
14	PI 2017705024	Pseudonymisation And Reversal Of Personally Identifiable Information
15	PI 2016000505	A System And A Method For Identification Of A Web Browser
16	PI 2015002794	System And Method For Online User Registration
17	PI 2016001041	A Method For Generating One-Time Keys For Single Line Authentication
18	PI 2014002607	Method And System For Bidirectional Visual Data Exchange Between Devices
19	UI 2014003349	Method And System For Intra Device Agent Based Authentication On Mobile Computing Device
20	PI 2015700568	Adaptive User Authentication Using Segregated Trust Evaluation Stages
21	PI 2015700997	Method And System For One Time User-To-User Delegation
22	PI 2015702370	Secure Installation And Management Of Mobile Applications For Multi-Mode User Authentication
23	PI 2015702497	User Authentication For Online And Offline Applicability
24	PI 2012004001	User-Centric Online Identity Management
25	PI 2015703654	A System And Method For Generating Completely Automated Public Turing Test To Tell Computers And Humans Apart
26	PI 2014002191	System And Method Of Mutual Authentication Using Barcode
27	PI 2013004237	System And Method For Cryptographic Interactions For Authentication And Authorization Using Out-Of-Band Inputs And Outputs
28	PI 2014702046	Method And System For Computation And Verification Of Authentication Parameters From Independant Measurements Of Time Or Location
29	PI 2014702836	A System And Method For Authenticating A User Based On User Behaviour And Environmental Factors
30	PI 2012003211	A System And Method For Multimodal Authentication Platform
31	PI 2012003210	A System And Method For Authentication Using Non-Reusable Random Generated Mobile SMS Key
32	PI 2015001988	Secure Communication Mechanism Between Applications On A Computing Device
